RC-E5

5 Gang Extension Lead with Remote Control

Item ref: 429.950UK

User Manual

CAUTION
The appliance is not intended for use by children or infirm persons without supervision.

The energy efficient extension lead that allows you switch appliances off completely so that they use no electricity rather than leaving them on standby, unnecessarily using electricity that is costing you money and contributing to harmful carbon dioxide (CO2) emissions into the environment.

The standby extension lead with 5 sockets is ideal if you have a large range of electrical appliances (AV or PC accessory devices) which are often left on standby. The standby extension lead remote can control unlimited different appliances, simply plug in each appliance to the standby extension lead.

With surge protection function, which can absorb surges of small lighting strike and spikes from power supply system in high speed to protect your product and home appliances in bad working condition. Helping to prolong the service life of product itself and connected devices.

Your extension lead will remain in the “Off” mode after a power out, even when the power comes on again.

Technical data:

Power for transmitter…….. DC 12V (23A 1pc battery)
Transmission frequency…… 433.92MHz (CE 1177)
Remote control distance…… 30M (free area)
Working voltage for sockets……..…… 240V ~/50Hz
Max. load power for total five sockets…… 2400W
Standby power…… 0.58W
A “Declaration of Conformity” can be obtained by email request to support@avslgroup.com

Operation:

The transmitter has 5 group buttons with individual ON and OFF function, each push one “ON” button, you will turn on the connected electrical device individually;

as the same you each push one “OFF” button, the corresponding connected electrical device will be shut off automatically. Be very convenient and practical for users.

Notes:

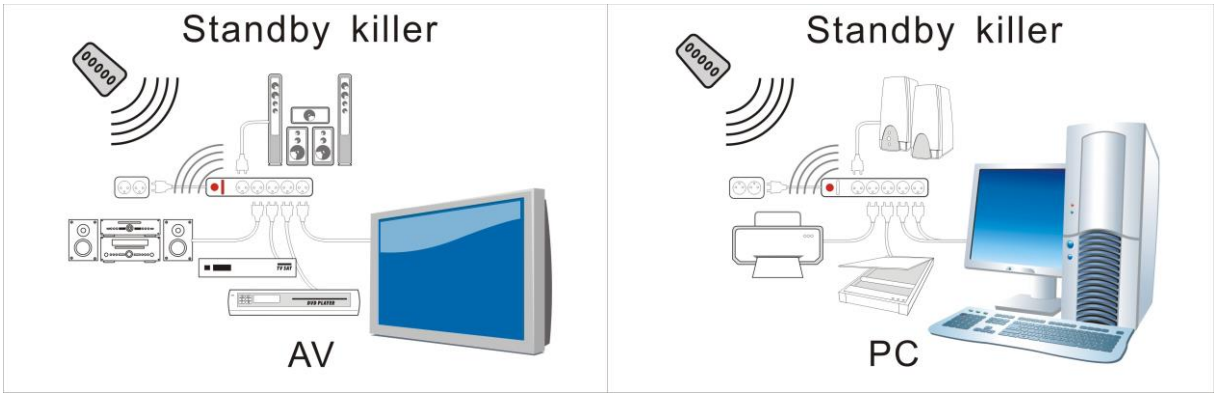
1. Please read above instructions manual carefully before use;

2. Do not exceed the maximum load power;

3. For indoor use only. It should be installed in a ventilated, cool and far-from-high-temperature place. Make sure to avoid sunlight, raining and moisture;

4. When the remote control distance becomes short obviously or the remote control LED gets dim obviously, change new same type batteries soon, dispose the old batteries with consideration for environment protection.

Applications show:



This “Crossed Wheelie Bin” symbol on the product means that the product is classed as Electrical or Electronic equipment and should not be disposed with other household or commercial waste at the end of its useful life. The goods must be disposed of according to your local council guidelines.
